Ashwin Praveen

Business Development & Techno-Commercial Professional
Green Hydrogen | Battery Energy Storage | Electrochemistry

Professional Summary

Proactive business development and techno-commercial professional with 5+ years of experience in the renewable energy sector, specializing in electrochemical technologies, batteries, and green hydrogen. Currently part of the MD & CEO's Office at Kalpataru Projects International Limited, supporting senior leadership on EPC bid strategy and techno-commercial evaluation for green hydrogen and battery energy storage (BESS) projects.

Experience spans technical sales, market development, and large-scale tender bidding, combining engineering depth with commercial judgement. Known for turning complex technical requirements into credible, competitively priced proposals, and for building the market intelligence and partnerships that sustain growth.

Professional Experience

Kalpataru Projects International Limited (KPIL)

Assistant Manager, MD & CEO's Office

June 2025 to Present | Mumbai

- Support techno-commercial evaluation of green hydrogen EPC and battery energy storage (BESS) opportunities, helping leadership decide which tenders to pursue and how to position them.
- Prepared EPC tender bids for utility-scale BESS projects in India, covering degradation modelling, augmentation planning, round-trip efficiency (RTE) analysis, and CAPEX optimisation.
- Developed management-level bid strategy material on the transition from first-stage to final price bids, including technical freeze, delta register, bottom-up cost build-up, risk controls, and a phased action plan.
- Compiled and maintain a Green Hydrogen Tender Tracker for India covering SECI SIGHT tranches, PSU refinery tenders, fertilizer auctions, steel pilots, and hub projects, informing pipeline and pursuit decisions.
- Create decision-ready decks, cost models, and briefing notes for senior management, aligned to KPIL's presentation standards.
- Coordinate across engineering, procurement, finance, and commercial teams to keep bid assumptions, pricing, and technical scope consistent.

BGR Tech Ltd.

Business Development Engineer

December 2023 to June 2025 | Chennai

- Identified and resolved technical challenges in electrochemical cells, electrolyzers, and hydrogen storage systems, enabling efficient and reliable green hydrogen solutions.
- Conducted in-depth market research and competitive analysis to identify emerging trends, assess market potential, and shape strategic direction in the green hydrogen sector.
- Generated high-value business opportunities and sales leads through targeted outreach, proposal development, client engagement, and negotiation.
- Developed and managed budgets, financial forecasts, and viability models to support key business decisions and project-level profitability.
- Monitored financial performance metrics to evaluate ROI and drive improvements across product and project portfolios.

Associated Electrochemicals Pvt. Ltd.

Technical Sales Engineer

April 2022 to November 2023 | Delhi

- Served as the primary technical liaison for 100+ customers across five states, providing product knowledge, technical support, and post-sales engagement.
- Delivered product demonstrations, technical presentations, and training sessions on the applications and advantages of PE (polyethylene) separators across industries.
- Developed and executed monthly marketing strategies backed by embedded market research, improving sales conversions and brand visibility.
- Built and maintained a demand-based product database segmented by industrial region, enabling data-driven supply chain planning and cost optimization.
- Worked with Engineering, R&D, and Marketing teams to align product development with market trends and customer feedback.

Education

B.Tech, Chemical and Electrochemical Engineering

CSIR-Central Electrochemical Research Institute (CECRI), Karaikudi, Tamil Nadu

2015 to 2019

Core Competencies

- **Bid and tender management:** EPC tender preparation, first-stage to final price bid strategy, technical freeze, delta registers, and bottom-up cost build-up.
- **Energy storage and Green Hydrogen economics:** Degradation and augmentation modelling, RTE analysis, CAPEX optimisation, and viability modelling for BESS and green hydrogen projects.
- **Policy and market intelligence:** India green hydrogen landscape including the National Green Hydrogen Mission (NGHM), SECI SIGHT incentives, BOO tenders, and VGF mechanisms.
- **Business development:** Lead generation, outreach, proposal development, negotiation, and long-term client and stakeholder relationships.
- **Technical communication:** Product demonstrations, training sessions, and management presentations that make technical detail easy to act on.
